Where in the world does our food come from?

- ◆ South America
- ◆ Caribbean
- ◆ Africa
- ◆ Middle-East
- ◆ Asia

Upper Foundation Knowledge Organiser

SPRING 2

Growing

DANE ROYD SCHOOL

Facts

Petal

Petals attract insects to the plant.

Plants need insects to bring pollen they have collected from other flowers so they can make seeds.

Petals are bright colours to attract the insects.

Leaf

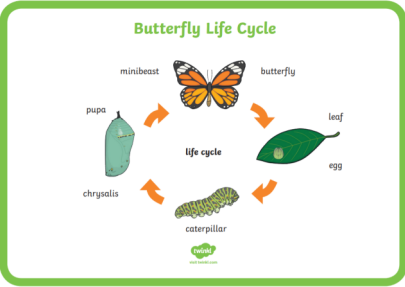

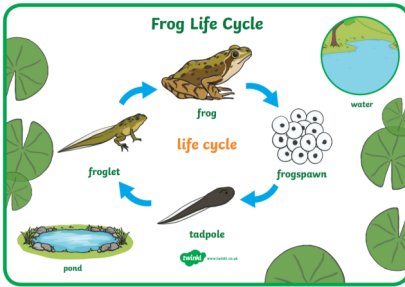

Leaves make food for the plant from carbon dioxide in the air and sunlight.

Stem

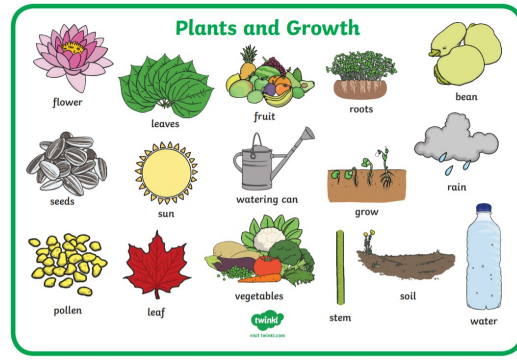

The stem transports water around the plant. It also holds the plant upright so it can get more sunlight.

Roots

Roots absorb minerals and water from the soil. The roots also help the plant anchor in the soil and stay upright.

Words

Class Text

- PLANT(S)
 The Tiny Seed
 A Seed in Need
 Oliver's Vegetables
 The Extraordinary Gardener
 Errol's Garden
