

Medical Needs Policy

DANE ROYD SCHOOL

Review frequency: 2 years

Approval by: Standards Committee/Governing Body

Policy Date: September 2024
Review Date: September 2026
Lead Personnel: James Davison
Version: 2
Revision Date:

Aims which guide our policies and practice

As a school, we seek to promote shared moral and ethical values to unite both local and global interests which enable children to become global citizens. Our agreed school aims are:

- To create a happy and stimulating learning environment, in which each child will develop to their full potential, thereby achieving high educational standards.*
- To develop self-awareness, self-respect and tolerance of others by developing an understanding of the world in which they live.*
- To appreciate human achievements and aspirations; develop aesthetic sensitivity and appreciation; physical ability and co-ordination and a concern for the safety of themselves and others.*
- To prepare children to live and work with others, enabling them to be responsible and caring members of the community.*
- To give children, at the end of their period of primary education, an appetite for acquiring further knowledge, experience and skills, so ensuring they are prepared for the challenges of the next stage in their education.*

We ensure that all of our policies and practices are guided by these aims and we seek to ensure that they are at the forefront of all that we do.

1. Aims

Our school is an inclusive community that welcomes and supports pupils with medical conditions. Our school provides all pupils with any medical condition the same opportunities as others at school.

This policy aims to ensure that:

- Pupils, staff and parents understand how our school will support pupils with long-term medical conditions
 - Pupils with medical conditions are properly supported to allow them to access the same education as other pupils, including school visits, residentials and sporting activities
- The governing board will implement this policy by:
- Making sure sufficient staff are suitably trained
 - Making staff aware of pupil's condition, where appropriate
 - Making sure there are cover arrangements to ensure someone is always available to support pupils with medical conditions
 - Providing covering teachers with appropriate information about the policy and relevant pupils
 - Developing and monitoring individual healthcare plans (IHPs)

The named persons with responsibility for implementing this policy are James Davison, SENCO and Emma Wake, HR Manager.

2. Legislation and statutory responsibilities

This policy meets the requirements under [Section 100 of the Children and Families Act 2014](#), which places a duty on governing boards to make arrangements for supporting pupils at their school with medical conditions and the Equality Act (England, Wales and Scotland).

It is also based on the Department for Education's statutory guidance: [Supporting pupils at school with medical conditions](#).

3. Roles and responsibilities

3.1 The governing body

The governing body has ultimate responsibility to make arrangements to support pupils with medical conditions. The governing body will ensure that sufficient staff have received suitable training and are competent before they are responsible for supporting children with medical conditions.

3.2 The headteacher

The headteacher will:

- Make sure all staff are aware of this policy and understand their role in its implementation
- Ensure that there is a sufficient number of trained staff available to implement this policy and deliver against all individual healthcare plans (IHPs), including in contingency and emergency situations
- Take overall responsibility for the development of IHPs
- Make sure that school staff are appropriately insured and aware that they are insured to support pupils in this way
- Contact the school nursing service or any other medical professional in the case of any pupil who has a medical condition that may require support at school
- Ensure that systems are in place for obtaining information about a child's medical needs and that this information is kept up to date

3.3 Staff

Supporting pupils with medical conditions during school hours is not the sole responsibility of one person. Any member of staff may be asked to provide support to pupils with medical conditions, although they will not be required to do so. This includes the administration of medicines.

Those staff who take on the responsibility to support pupils with medical conditions will receive sufficient and suitable training, and will achieve the necessary level of competency before doing so.

Teachers will take into account the needs of pupils with medical conditions that they teach. All staff will know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

3.4 Parents

Parents will:

- Provide the school with sufficient and up-to-date information about their child's medical needs
- Be involved in the development and review of their child's IHP and may be involved in its drafting
- Carry out any action they have agreed to as part of the implementation of the IHP e.g. provide medicines and equipment

3.5 Pupils

Pupils with medical conditions will often be best placed to provide information about how their condition affects them. Pupils should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of their IHPs. They are also expected to comply with their IHPs.

3.6 School nurses and other healthcare professionals

Our school nursing service may notify the school when a pupil has been identified as having a medical condition that will require support in school. This will be before the pupil starts school, wherever possible.

Healthcare professionals, such as GPs and paediatricians, will liaise with the schools nurses and notify them of any pupils identified as having a medical condition.

4. Equal opportunities

Our school is clear about the need to actively support pupils with medical conditions to participate in school visits/residentials, or in sporting activities, and not prevent them from doing so.

Our school will consider what reasonable adjustments need to be made to enable these pupils to participate fully and safely on school visits/residentials and sporting activities. This includes out of school clubs and team competitions.

Our school understands that all relevant staff are aware that pupils should not be forced to take part in activities if they are unwell. They should also be aware of pupils who have been advised to avoid/take special precautions during activity, and the potential triggers for a pupil's medical condition when exercising and how to minimise these.

Our school makes sure that pupils have the appropriate medication/equipment/food with them during physical activity.

Our school will refer pupils with medical conditions who are finding it difficult to keep up educationally to the SENCO who will liaise with the pupil (where appropriate), parent and the pupil's healthcare professional.

Risk assessments will be carried out so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included and plans are put in place for any additional medication, equipment or support that may be required. In doing so, pupils, their parents and any relevant healthcare professionals will be consulted.

Our school is committed to keeping in touch with a child when they are unable to attend school because of their condition.

5. Being notified that a child has a medical condition

When the school is notified that a pupil has a medical condition, the process outlined below will be followed to decide whether the pupil requires an IHP.

The school will make every effort to ensure that arrangements are put into place within 2 weeks, or by the beginning of the relevant term for pupils who are new to our school.

See Appendix 1.

6. Individual healthcare plans

The headteacher has overall responsibility for the development of IHPs for pupils with medical conditions. This has been delegated to James Davison, SENCO and Emma Wake, HR Manager.

Plans will be reviewed if there is evidence that the pupil's needs have changed.

Plans will be developed with the pupil's best interests in mind and will set out:

➤ What needs to be done

➤ When

➤ By whom

Not all pupils with a medical condition will require an IHP. It will be agreed with a healthcare professional and the parents when an IHP would be inappropriate or disproportionate. This will be based on evidence. If there is not a consensus, the headteacher will make the final decision.

Plans will be drawn up in partnership with the school, parents and a relevant healthcare professional, such as the school nurse, specialist or paediatrician, who can best advise on the pupil's specific needs. The pupil will be involved wherever appropriate.

IHPs will be linked to, or become part of, any statement of special educational needs (SEN) or education, health and care (EHC) plan.

The level of detail in the plan will depend on the complexity of the child's condition and how much support is needed. The governing board and James Davison, SENCO and Emma Wake, HR Manager will consider the following when deciding what information to record on IHPs:

➤ The medical condition, its triggers, signs, symptoms and treatments

➤ The pupil's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g. crowded corridors ➤ Specific support for the pupil's educational, social and emotional needs. For example, how absences will be managed, requirements for extra time to complete assessments, use of rest periods or additional support in catching up with lessons, counselling sessions

➤ The level of support needed, including in emergencies. If a pupil is self-managing their medication, this will be clearly stated with appropriate arrangements for monitoring

➤ Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional, and cover arrangements for when they are unavailable

➤ Who in the school needs to be aware of the pupil's condition and the support required

➤ Arrangements for written permission from parents and the headteacher for medication to be administered by a member of staff, or self-administered by the pupil during school hours

➤ Separate arrangements or procedures required for school visits/residential or other school activities outside of the normal school timetable that will ensure the pupil can participate, e.g. risk assessments

➤ Where confidentiality issues are raised by the parent/pupil, the designated individuals to be entrusted with information about the pupil's condition

➤ What to do in an emergency, including who to contact, and contingency arrangements

7. Managing medicines

See managing medicines policy

8. Emergency procedures

Staff will follow the school's normal emergency procedures (for example, calling 999). All pupils' IHPs will clearly set out what constitutes an emergency and will explain what to do.

If a pupil needs to be taken to hospital, staff will stay with the pupil until the parent arrives, or accompany the pupil to hospital by ambulance.

Our school is committed to identifying and reducing triggers both at school and on out of school visits.

Staff have been given training and written information on medical conditions which includes avoiding/reducing exposure to common triggers. It has a list of the triggers for pupils with medical conditions at this school, has a trigger reduction schedule and is actively working towards reducing/eliminating these health and safety risks.

The IHP details and individual pupil's triggers and details how to make sure the pupil remains safe throughout the whole school day and on all out of school activities, taking into account the needs of pupils with medical needs.

Our school reviews all medical emergencies and incidents to see how they could have been avoided, and changes school policy according to these reviews.

9. Training

Staff who are responsible for supporting pupils with medical needs will receive suitable and sufficient training to do so.

The training will be identified during the development or review of IHPs. Staff who provide support to pupils with medical conditions will be included in meetings where this is discussed.

The relevant healthcare professionals will lead on identifying the type and level of training required and will agree this with Emma Wake, HR. Training will be kept up to date.

Training will:

- Be sufficient to ensure that staff are competent and have confidence in their ability to support the pupils
- Fulfil the requirements in the IHPs
- Help staff to have an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative measures

Healthcare professionals will provide confirmation of the proficiency of staff in a medical procedure, or in providing medication.

All staff will receive training so that they are aware of this policy and understand their role in implementing it, for example, with preventative and emergency measures so they can recognise and act quickly when a problem occurs. This will be provided for new staff during their induction.

10. Record keeping

The governing body will ensure that written records are kept of all medicine administered to pupils.

Parents will be informed if their pupil has been unwell at school.

IHPs are kept in a readily accessible place which all staff are aware of.

11. Liability and indemnity

The governing body will ensure that the appropriate level of insurance is in place and appropriately reflects the school's level of risk.

The details of the school's insurance policy are:

QBE Insurance Ltd – Employers and Public Liability which cover staff providing support to pupils with medical conditions including the administration of medication.

12. Complaints

Parents with a complaint about their child's medical condition should discuss these directly with the Emma Wake, HR Manager in the first instance. If the matters remains unresolved parents will be directed to the school's complaints procedure.

13. Monitoring arrangements

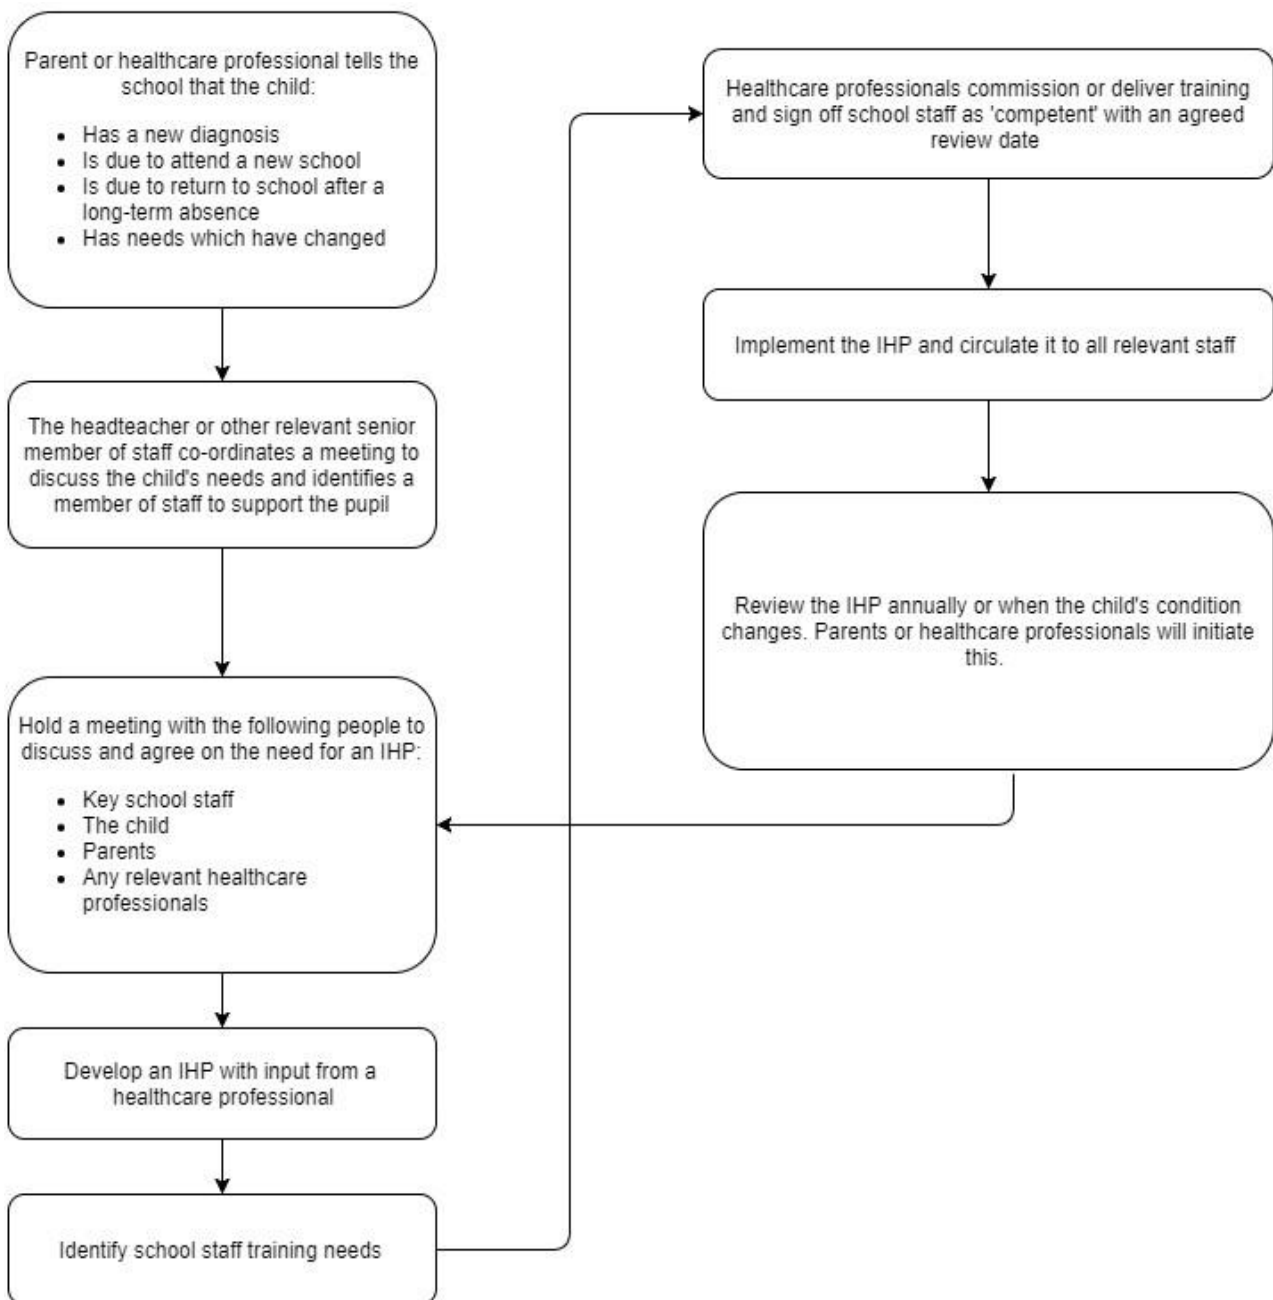

This policy will be reviewed and approved by the governing body every 2 years.
